

LIVE HERRING

November 16-19, 2006 Jyväskylä

<http://www.liveherring.org>

Live Herring media art event is organised for the second time in 2006. At Live Herring there is a Nordic net art event with a open net art work shop lead by media artist Outi Kotala, lecture series (in English) on media art in general and Vadelma club. **The events are open and free for all.**

Exhibition and workshop:

Thu-Sat 11-18 and Sun 11-16

Jyväskylä University, Opinkivi YOL139

Live Herring Nordic net art exhibition presents Nordic net art from user interface art to web poetry and art works that are formed outside net. The exhibition works can be seen/experienced via internet not only in the exhibition but all over the world. The primary aim of the exhibition is to present Nordic net art but also to bring net art closer to the general public by making the exhibition easily accessible. We wish that in the future as many of our exhibition visitors as possible would view net art on their own computers at home. In the workshop organized at the exhibition venue, the audience is welcome to build an artwork together with artist **Outi Kotala**. **Minun kyläni / My Village** is a public media artwork in the internet. In the open workshop you can see how the map of the village develops, and draw your wishes on the map either by computer or on paper. The workshop is open at the exhibition hours and the artist herself is present in the workshop.
